**Home Diagnostics and iMetrikus Enter Co-Marketing
Partnership to Offer Diabetes Management Solution for
People with Type 1 and Type 2 Diabetes**

June 3, 2005 – Fort Lauderdale, FL – Home Diagnostics, Inc., a leading manufacturer of diabetes self-testing equipment, and iMetrikus, a pioneer in healthcare technology, announced today a partnership designed to provide users of the TrueTrack Smart System™ and Prestige IQ® blood glucose monitors with the ability to monitor their diabetes on-line by using MediCompass, an award-winning health management software.

As part of the agreement, Home Diagnostics, Inc., manufacturer of the TrueTrack Smart System™ and Prestige IQ®, will promote iMetrikus' MediCompass health management software to its customers.

iMetrikus is the developer of the preferred MediCompass Web-based software that enables patients to upload their blood glucose test results and other key health data.

"We are delighted to be teaming with iMetrikus to offer our customers a way to enhance their ability to manage diabetes", said Teri Sasse, RN, MS, and Director of Professional Marketing for Home Diagnostics, Inc. "By providing patients with a tool that allows them to analyze blood glucose results and identify patterns, patients are empowered to make informed treatment decisions and take a more active role in managing their condition," added Sasse.

The MediCompass diabetes management system was awarded top honors in a survey conducted by The Department of Family Medicine at the University of Iowa. In results published in "The Diabetes Educator," the official journal of the AADE, MediCompass earned the highest ranking among 14 Web-based programs for providing the most effective, comprehensive and easy-to-use diabetes management system.

The MediCompass program allows users to upload glucose readings directly from their TrueTrack Smart System™ blood glucose monitor into a personalized action plan. Individuals can record and edit medications, nutrition plans, physical activities and other health related information and make the changes necessary to improve control of their diabetes.

– more –

"Home Diagnostics, Inc. recognizes the importance of regular blood glucose testing for all persons with diabetes and we are pleased to be working with them to provide an integrated, affordable and leading-edge solution for all persons committed to gaining greater control over their condition," said Matt Sanders, CEO, iMetrikus.

Home Diagnostics, Inc. will promote the software via an insert accompanying all newly purchased TrueTrack Smart System™ and Prestige IQ® blood glucose monitors. People who wish to begin uploading their blood glucose readings directly on to the MediCompass program, can do so using a Smart Data cable that plugs into a desktop or laptop computer with an Internet connection. Home Diagnostics, Inc. is offering the cables free of charge – plus a small \$6.95 shipping and handling fee. For complete information about how to equip the True Track Smart System™ with the web-based, MediCompass software, please call the following toll free number: 1-866-476-3837 or visit www.homediagnostics.com.

The MediCompass system can also be accessed via the Yahoo! Health Diabetes Center; interested users can take a tour of MediCompass and sign up for the low-cost service at the following web address:
